INDUSTRY EXHIBITION

Monday, June 9  10.00* - 18.00
Tuesday, June 10  10.00* - 18.00
Wednesday, June 11  10.00* - 18.00
Thursday, June 12  10.00* - 14.00

HALLS 12, 13, 14, 15, 16 and 17

* Exhibitors and delegates mounting posters can access the exhibition halls from 8.00 hrs.
Abbott................................................Hall 14, booth 2
Abbott Laboratories is a global health care company dedicated to providing quality renal care products. Abbott’s renal product line includes diagnostic assays, pharmaceuticals for the treatment and prevention of secondary hyperparathyroidism and for transplant anti-rejection, and nutritional supplements for patients with renal disease. Please visit our booth and website for more details. Website: http://abbott.com

Affina Immuntechnik...........................................15.15
Affina Immuntechnik GmbH develops produces and sells innovative immune adsorbers for the treatment of autoimmune diseases, e.g. rheumatoid arthritis or dilated cardiomyopathy (DCM). Extracorporeal immunoadsorption is a new treatment method removing disease-related autoantibodies from patient’s blood. The adsorbers used contain newly designed peptide-based ligands. Affina has two products on the market: Globaffin® and Coraffin®. Website: www.affina.com

Allmed................................................................17.27/II
Allmed GmbH / Germany is a new international brand name contributing to the latest high standard dialysis products with all products steam sterilised. The Allmed Group partners are pleased to offer a customised solution to each dialysis professional and/or patient. Due to our long nephrology/dialysis field experience we are able to give personalised assistance to our customers.

American Journal of Kidney Diseases.............17.20

Amgen.................................................................12.17
As the world’s largest independent biotechnology company, Amgen is committed to advancing the science and practice of nephrology. Amgen’s focus helps ensure that you have the treatments you need to successfully care for your patients. To find out more, stop by the Amgen booth. We are proud to be a sponsor of the World Congress of Nephrology 2003.

Asahi.................................................................15.19
Asahi Medical responds to the needs of customers through research, development and manufacture of filters for dialysis and plasma therapy. Via our Distributors in Europe, Asahi Medical provides various dialyzers such as Biomembrane, PAN and Asahi Polysulfone (APS) and Clirans EXCEBRANE.
for your dialysis needs. For plasma therapy and rheological disorders, Plasmaflo, Cascadeflo and Rheofilters are available.

AtCor Medical ........................................................ 12.04
AtCor Medical market the innovative SphygmoCor non-invasive clinical device- it now enables you to see early, diagnose and manage the central arterial stiffening effects driving your renal patient’s risk of heart failure, stroke and MI. SphygmoCor is the new BP/CV clinical management tool for renal patients.

B. Braun ................................................................. 15.23
B. Braun is an internationally active company with different divisions, offering a complete range of hospital supplies. MedTech Division is providing the complete line of products and services in the field of extracorporeal blood treatment, including Haemodialysis (Dialog+), Acute Dialysis (Diapact CRRT) and LDL Apheresis with new indication for Sudden Hearing Loss (Plasmat Futura).

Baskent University ................................................. 12.23

Baxter ................................................................. 15.25
Baxter offers a complete range of products related to dialysis treatment, as well as services designed to improve medical outcomes and quality of life for renal patients around the world. These include a portfolio of advanced PD solutions, state of the art APD, systems designed to simplify the delivery of sophisticated HD, clinical monitoring and educational programs for improved therapy management. Come and visit us at stand 25, Hall 15.

Bayer Diagnostics .................................................. 14.04

Bellco ................................................................. 15.21
With over 30 years of experience, Bellco continues to be active in the haemodialysis worldwide market with a complete product line of disposables and machines for the treatment of chronic renal failure. Taken over in 1990 by Sorin Biomedica, Bellco was given the opportunity to further strengthen its innovative and technical profile, securing its development and continued growth. Today Bellco is the Renal Care Business Unit of the SNIA S.p.A., a company listed on the Italian Stock Exchange. It develops and manufactures a broad range of medical...
devices used to treat cardiovascular and renal diseases. These products are sold throughout the world through a highly specialised distribution network. In April 2002, Bellco acquired the French company Soludia, specialists in dialysis concentrates and solutions. With this acquisition, Bellco (Snia Group) has strengthened its presence in France and Europe adding a significant new range of products to the company portfolio.

Bionic Medizintechnik.................................15.01
Bionic Medizintechnik, a subsidiary of JMS (Japan Medical Supply), has successfully focused on vascular access and furniture for dialysis. With the most extensive range of fistula needles, temporary and implantable dialysis catheters, Bionic offers a solution for all vascular access procedures. Bionic therapy chairs and beds are leaders in performance and ergonomics.

Bioteque.........................................................15.02

Blackwell Publishing.....................................17.10
Blackwell Publishing is pleased to offer delegates, the opportunity to view and take free sample copies of our Nephrology related Journal titles as well as a comprehensive list of book titles, all offered at a special congress discount. These titles may be ordered or bought directly from the stand.

Boehringer Ingelheim.................................14.07
The Boehringer Ingelheim group of companies ranks among the 20 leading pharmaceutical corporations in the world and has 156 affiliated companies in 44 countries worldwide. Since 1885, Boehringer Ingelheim is a privately held company, headquartered in Ingelheim, Germany, with a long history of successfully marketed pharmaceutical innovations. Research and development, production and distribution facilities are located around the globe. In 2002, Boehringer Ingelheim’s R&D spending was more than EUR 1.3 billion which is about a fifth of net sales in Prescription Medicines.

Colin Europe...............................................17.33
Colin, specialized in development of NIBP measurement, has presented a unique technology dedicated to HD patients. The HASTE function (Harmonized Alert Sensing TECnology), installed on a patient monitor allows the caregiver to observe hypotension non-invasively during HD and automatically activate NIBP measurement when the
patient’s condition changes. More attentive care is possible with Haste. Website: http://www.colin-europe.com

Culligan.........................................................................................12.10

Cybernius.................................................................................15.11
Cybernius Medical delivers optimised solutions for the renal care provision process. The Renal Patient Care Management System cyberREN® is a comprehensive renal system, which supports all treatment modalities, includes international and country specific interfaces and coding and is available as a fully functional standard. cyberREN® is used at over 70 sites in Canada, the United States and the UK and is available in a German version.

Dade Behring.................................................................12.27
Dade Behring - exclusively focused on laboratory diagnostics - offers a wide panel of tests and instrumentation providing intelligent solutions for greater workflow efficiency and better patient outcomes. With its high quality products, services and technical support, Dade Behring consolidates the partnership to its customers. As a worldwide leader for nephelometry and innovative dedicated protein testing, Dade Behring continues its success in emerging fields. Website: www.dadebehring.com

Dialysis & Transplantation..............................................17.16
Dialysis & Transplantation is celebrating its 32nd year of distinguished service to the renal care community. Among nephrology journals, D&T has the largest multidisciplinary audience in the U.S.A. and is read in more than 120 foreign countries. D&T provides peer-reviewed articles that have specific clinical application on topics of most interest to renal care practitioners.

Diamed...............................................................15.20
Diamed has been among the German market leaders in dialysis and plasmatherapy for 27 years. The innovative Asahi polysulfone® dialyser represents the gold standard in High-Flux dialysis. Multifunctional Octo Nova® technology offers safe, effective treatment with Haemofiltration, CVVH, Plasmaexchange, LDL-apheresis, Immunoadsorption, Rheopheresis, Toxinapheresis and Haemoperfusion. DIAMED is the only complete systems supplier for these indications in plasmatherapy and intensive care. Website: www.diamed-koeln.de
EXHIBITORS

Dustri-Verlag..............................................................17.11
DWA.............................................................................15.24
E-Med......................................................................15.05
EDTNA/ERCA...........................................................17.08

Edwards Lifesciences..................................................15.29
Edwards Lifesciences has been a world leader in Critical Care products for more than 30 years. Today, we are leading the way in setting new standards in Haemofiltration technology with our Aquarius Haemofiltration machine which is unsurpassed in flexibility, simplicity and is designed to deliver a wide range of therapies. Edwards has the complete range of high quality products required to perform Haemofiltration: Access catheters, filters, solutions and the original BM25 machine for those with less advanced technology needs.

Elsevier Science......................................................17.25
Elsevier is a major health science publisher and provides a comprehensive range of books, journals and electronic products to meet the needs of busy professionals, clinicians and researchers, and students. To complement our wide range of titles we will be launching Johnson: Comprehensive Clinical Nephrology at the meeting.

ERA-EDTA 2004..........................................................17.24
The 41st Annual Congress of the ERA-EDTA will be held in Lisbon (Portugal) in 2004, May 15-18. The ERA-EDTA, with nearly 6000 members, publishes the journal Nephrology Dialysis Transplantation and organises annual congresses in Europe. It is one of the Associations involved in organizing the World Congress of Nephrology 2003. For more information please visit the websites: www.era-edta.org and www.eraedta2004.org.

Fresenius.................................................................16.01
Fresenius Medical Care is the world’s leading integrated provider of products and services for individuals with renal failure. Fresenius Medical Care is also the world’s leading provider of dialysis products, such as haemodialysis machines, dialysers, products for peritoneal dialysis and related disposable products as well as other extracorporeal therapies. At our booth we show systems, solutions and disposables for acute renal replacement therapy and related blood purification.
Fujisawa

Fujisawa is one of the world’s top 30 pharmaceutical corporations and a leader in the field of solid organ transplantation with the immunosuppressant, Prograf® (tacrolimus). The use of this cornerstone agent is well established in liver and kidney transplantation, and increasing in heart, lung, pancreas, intestinal, and bone marrow transplantation. Tacrolimus is one of Fujisawa’s global flagship products.

Gambro

Over the last 38 years, Gambro has been a world leading company in renal therapy, with sales, service and support in more than 100 countries. Through extensive investment in research and development, and in cooperation with leading scientists and nephrologists worldwide, we are able to provide high quality, innovative, therapy enhancing products and services.

Genzyme

Genzyme is a leading international biopharmaceutical and healthcare company that develops and markets innovative products and services for patients and caregivers. Genzyme has two products in the renal care market. Renagel® (sevelamer), is a calcium-free, aluminium-free phosphate binder for phosphorus management in dialysis patients. Fabrazyme® (rh a-galactosidase) is indicated for enzyme replacement therapy to treat the underlying symptoms of Fabry disease. Visit us also at www.genzyme.com

Gilead

Glicorex Transplantation

GML

GML AG is an international operating subsidiary of the most important non profit organisation world wide with a background of over 30 years experience in nephrology and dialysis and more than 16,000 patients. GML AG offers participation in the GML-Partnership-System: Consulting, services and a wide range of materials are part of the GML AG product line.

Gruppe Moellers
EXHIBITORS

Gry Pharma.............................................................14.03
GRY Pharma GmbH, your competent nephrology partner in the South West of Germany, offers an efficient phosphate binder range on the basis of: aluminium hydroxide gel (anti-phosphate), calcium acetate (Phos-Ex®) and calcium carbonate (Dreisacarb®) Bondiol® (Alfacalcidol) and Osteotriol® (Calcitriol) indicated at renal osteodystrophy; CosmoFer® at renal anaemia. For the enhancement of residual diuresis, Furosemid 500 mg (Fusid® 500) is available. CPS powder implicates a higher quality of life due to a controlled potassium level. Dreisavit® N and DreisaFol® provide vitamins to cover the patients’ needs adequately.

Haemopharm..............................................................15.35
The main activity of Haemopharm Biofluids is the production and distribution of I.V. and dialysis solutions in bags and medical devices (empty bags). Innovative infusion products have been developed: in haemodialysis (PRIMINGLine®, HFLine®, CARBOLine®); in peritoneal dialysis (PERILine®); in drug administration (SHARPBag®). The R&D departments are working on a new concept of APD. For further information on our product range please visit our website at http://www.haemopharm.it.

Haidylena....................................................................17.27
In our 10 000 sqm plant our 600 employees provide innovative products for dialysis patients. We manufacture, market and distribute more than 25 models of dialyzers: cuprophan, hemophan, polyethersulfone (low, medium and high flux), blood lines, fistula needles, catheters, iv solutions, hemodialysis acetate and bicarbonate solutions, infusion and transfusion sets and our new haemodialysis machine. We have ISO 9002, CE mark and FDA.

HemaMetrics..............................................................15.31
HemaMetrics Corporation provides diagnostic products for the haemodialysis market. HemaMetrics manufactures, markets and distributes the “CRIT-LINE®” system. This revolutionary diagnostic instrument non-invasively measures whole blood constituents as well as access blood flow in real-time during haemodialysis. The monitoring and diagnostic capability of the CRIT-LINE® technology provides better clinical outcomes, lower overall costs and improved quality of life for dialysis patients.
Herco

Herco Wassertechnik GmbH was founded in 1947 and since that time the name Herco has been recognized as a standard-setting provider of water technology. In 1979 the first reverse osmosis unit for haemodialysis was built and from that date until now Herco has designed advanced pure water systems for dialysis machines. Herco offers overall solutions comprising all necessary components such as: Reverse Osmosis - single or double-pass - suitable for hot disinfection, Permeate Loop with double hose connection for elimination of dead spaces, Central Concentrate Supply System, Media Panel.

Hexal

Hospal

Hospal, European manufacturer of haemodialysis equipment, will show the latest developments in advanced therapies and systems aimed at increased patient well-being, with the focus on critical patients such as diabetic patients. HOSPAL will present Dialysis Quality Control, AFB (Acetate-free Biofiltration) treatment, Physio Dialysis - the first biofeedback system - AN69 ST, the bioactive membrane, and Innova, the machine dedicated to quality in haemodialysis, as well as its full programme for Renal Intensive Care.

Idemsa

Idemsa is the leading Spanish developer and producer of dialysis products (dialyzers, blood lines and fistula needles) and other high-added value medical products. Founded in 1984, Idemsa is part of the biomedical group Modern Realisation. It supplies 20% of the Spanish market and exports 80% all over the world. Idemsa products have earned the CE mark and have earned the FDA approval. Website: www.idemsa.com

Infomed

Infomed, Switzerland, is providing blood epuration machines and their associated tubing sets. Its first product, the HF400, can run neo-natal/pediatric and adult haemofiltration, haemodiafiltration, plasma exchange and double filtration in both single and double needle. Its second product is a filter monitor which allows performance of cascade filtration using a centrifuge as plasma separator.
EXHIBITORS

ISPD...........................................................................17.07

Joline..........................................................................15.33

S. Karger..................................................................17.13
S. Karger Medical Publishers is a publishing house whose publications in the field of nephrology include four scientific journals, such as “Nephron”, and the renowned book series “Contributions to Nephrology”. New releases include the CD-ROM “Membranes and Filters for Haemodialysis, Database 2003” and the books “Peritoneal Dialysis Today” and “Renal Fibrosis”. Publications are accessible online at www.karger.com/nephrology, with full-text search and many other services.

Kluwer.........................................................................17.22

Kuraray Medical....................................................17.03
Kuraray Medical Inc. provides the Hollow Fiber Haemodialyzer KF-201, using EVAL (Ethylene Vinyl Alcohol Copolymer) membrane. In addition to the Haemodialyzer, Kuraray Medical Inc. supplies various products for Plasmapheresis utilizing the extracorporeal technique for patients with autoimmune diseases and others. For details, access the website of our parent company, Kuraray Co., Ltd.: www.kuraray.co.jp/en/index.html.

Lauer............................................................................15.28
Lauer Membran Wassertechnik GmbH, www.aquaboss.com LMW/Aquaboss® stands for innovation, quality and cost efficiency. Since 1989 Lauer is developing, manufacturing and marketing RO systems, accessory equipment for dead space, free supply of purified water and other liquid media used in dialysis. During the years Lauer has introduced several patented technologies in the renal market, e.g. impulse backwashing and secondary ring mains.

Leo.............................................................................15.32
Leo Pharma is one of the leading companies in the prophylaxis and treatment of renal osteodystrophy. We work to ensure appropriate use of One-Alpha® (alphacalcidol) in all relevant patients suffering from renal disease in pre-dialysis, dialysis and the post-transplantation stages of the disease. LEO Pharma is dedicated to post-graduate education of doctors treating patients with renal osteodystrophy.
Likamed .......................................................... 12.11 and 16.02
With the know-how of over 25 years experience, Likamed is the leading manufacturer of motor driven dialysis chairs and beds. Because excellent quality is very important for us, all of our products are TÜV tested, which means that they meet the rules of the medical product law.

Lilly Deutschland ..................................................... 12.05

Maltron ........................................................................ 15.03
Maltron, the world’s leading manufacturer of Bioelectrical Impedance systems which are used in the assessment of Body Composition and Fluid monitoring, will be showing their latest BioScan 916. BioScan is a non-invasive, low cost, hand held indispensable diagnostic tool for Nephrologists for estimating Intracellular, Extracellular and Interstitial Fluid, Dry weight, Body Cell mass, Mineral Composition and Total body Water, Fat and Fat Free Mass.

Mamisch .................................................................... 12.06
The company was founded on April 23, 1993, in Fürth/Odenwald. Today the company’s headquarters are at 67071 Ludwigshafen, Karl-Dillinger-Strasse 91. The Managing Director is Karin Mamisch. The current product range covers the production and sales of dietetic food for special medicinal purposes and food supplements for nephrology on the basis of our own recipes. Next year two of our products will have completed the registration procedure and will be launched as medication. The products of Mamisch GmbH are prescribed by doctors using prescriptions and sold through pharmacies.

MedComp .................................................................. 17.29
MedComp will be showing videos on techniques for long-term Hemo-Access using the MedComp Split Catheter. MedComp’s Split Catheter II is the only tunnelized, cuffed, vascular access catheter made of Carbothane Polyurethane, a polymer resistant to alcohol and iodine based solutions. The patented luminal design enables the clinician to separate the venous and arterial segments, creating two free floating lumens in the central vein. Each floating lumen has a 360 blood flow, making occlusion more difficult.
Medica was established in 1985, and since that time has been operating in the field of blood purification treatments like CRRT, thus providing a complete range of products for both Intensive Care Units and Dialysis Centres. Development of CRRT machines and associated disposables and polysulfone membranes and hollow fibers filters to assist patients affected by Acute Renal Failure, represents the main mission for Medica.

Medikit’s unbroken record of success began with a “world first”: our one-piece jointless catheter for dialysis, which commands a 60% share of the Japanese market. This technological achievement served as the springboard for Medikit’s dramatic growth. Since then, as a specialist catheter manufacturer, we have developed a series of ground-breaking products in rapid succession, making significant contributions to medical treatment.

Membrana is the largest independent membrane producer worldwide. Now part of Polypore inc., the world’s largest supplier of microporous membranes for medical applications, Membrana offers a wide range of capillary and flat membranes, particularly for haemodialysis and oxygenation. Products include CUPROPHAN®, HEMOPHAN®, SMC® and most recently, DIAPES® - a new synthetic membrane family, setting advanced standards in haemodialysis and representing the next generation of dialysis membranes.

Miltenyi Biotec - PlasmaSelect Division offers a platform technology for selective elimination of
pathogenic substances from blood. LDL-TheraSorb®, IG-TheraSorb® and RheoSorb® are available for patients suffering from severe hypercholesterolemia, autoimmune diseases and rheological disturbances. The Life 18 System - an integrated apheresis unit - combines the separation of blood and the controlled perfusion of plasma through those adsorber columns in a single device. (www.miltenyibiotec.com).

Minntech

Dialyzer Reprocessing Expertise, Support and Innovation: the right combination from the world leader in dialyzer reprocessing. Minntech’s Renatron® Automated Reprocessing System is used in thousands of dialysis facilities worldwide to reprocess dialyzers easily, reliably and economically, enabling high-quality dialysis for all patients. For further information contact info@minntechbv.com or visit our web-site www.minntech.com

National Kidney Foundation Singapore

The National Kidney Foundation Singapore (NKFS) is the world’s single largest not-for-profit dialysis provider. It is also involved in preventive healthcare and organ donation advocacy, benefiting over 600,000 Singaporeans annually. NKFS together with ASN, ANNA, AST and SOTS are organizing NephroAsia-TransplantAsia 2004 from 9-14 February 2004 in Singapore. Visit the NKFS booth or log-on to www.nephroasia.com

National Kidney Foundation USA

The National Kidney Foundation offers clinical practice guidelines and clinical action plans for medical professionals and patient resources on Chronic Kidney Disease and ESRD, including haemodialysis adequacy, peritoneal dialysis adequacy, vascular access, anaemia and nutrition. New guidelines for 2003 include dyslipidemias and bone disease.

Nebo

Nebo a/s markets the low molecular weight iron dextran CosmoFer® worldwide, except in the US where the product is named INFeD®. CosmoFer® is registered in ten countries in Europe and six countries outside of Europe. Nebo a/s is a company in the Danish Pharmacosmos group. Pharmacosmos is the largest producer in the world of injectable iron for the veterinary sector. During the last 10 years, Pharmacosmos has produced more than 50 million
doses of low molecular weight iron dextran for human use.

**Nefro-Ion**

Nefro-Ion was founded to develop and commercialize breakthrough technologies, including those to prevent and stop the progression of amyloid-related diseases. The Company will feature its innovative core technology which allowed for the advancement of a drug candidate into a pivotal phase II / III clinical trial to assess its efficacy and safety in the treatment of patients suffering from secondary (AA) amyloidosis. Neurochem will also present epidemiologic and other information data corollary to a better understanding of the disease. Secondary AA amyloidosis is associated with chronic inflammatory and infectious diseases. The most common clinical presentation of secondary (AA) amyloidosis is nephrotic-range proteinuria with or without renal insufficiency.

**Nephros**

Nephros Clinical studies have demonstrated that the OLpur™ line of Nephros haemodiafiltration products can increase HDF efficacy by more than 85%. Come by to review the data and learn how easily you can enjoy all the benefits of cutting edge mid-dilution haemodiafiltration therapy using your existing dialysis equipment.

**Nikkiso**

Nikkiso-Medical GmbH, Hamburg-based European headquarters and subsidiary of Nikkiso Co. Ltd., Tokyo, was founded in 1997 and offers the full range of dialysis products and related services to all European Countries. After the successful introduction of a new generation of dialysis machine, we will integrate new dialyzers in 2003 and expand our business, gradually widening our presence on the European market.

**Nipro**

Nipro’s dialysers and various disposable medical devices were born out of an abundance of innovative ideas and technology that have introduced previously non-existent functions and performance. NIPRO currently offers a total product line related to dialysis. In pursuit of Safety in Medical Care and towards true Quality of Life, actively advancing into ever-new fields, Nipro’s goal is to be recognized
worldwide as a leading global brand.

Novartis.................................................................17.26

Nutricia.................................................................12.22
Nutricia provides a range of specialised clinical nutrition support products: for renal patients needing oral supplementation, Nutricia has developed Renilon. These products are specifically designed for pre-dialysis and dialysis patients to maintain or improve their nutritional status and increase well-being. For information on Nutricia, please have a look at the website: www.nutricia.com

Ortho Biotech.........................................................13.02
Ortho Biotech, the established market leader in anaemia management therapy across multiple product uses, is committed to leading the fight against serious illnesses and has earned a global reputation for researching, manufacturing and marketing innovative healthcare products that extend and enhance the quality of patients’ lives. Ortho Biotech markets epoetin alfa under the trade name EPREX®/ERYPO® and is part of the Johnson & Johnson family of companies.

Pharmacia.................................................................14.06
Pharmacia Corporation is a global, innovation-driven pharmaceutical and health care company. Our products, services and employees demonstrate the company’s commitment to improve wellness and quality of life for people around the world. We look forward to your questions and comments.

Rena Select.............................................................12.14

RheoMed.................................................................15.34
RheoMed GmbH represents medical devices like the RheoChair, a dialysis chair; and the RheoClot, an ACT-Timer. Other products are the SERIM Test Strip Program; the NEW ARNOLD balance chair; the RheoSteril disinfectant program and disposables such as bicarbonate cartridges, dialyzers and catheters. All these products are fit for the dialysis market.

Roche.................................................................12.16
Headquartered in Basel, Switzerland, Roche is an innovation driven global healthcare leader focused on pharmaceuticals and diagnostics. Roche is worldwide number one in diagnostics, oncology and transplantation and has a leading position in
Virology. With products and services that address the prevention, diagnosis and treatment of diseases, the company contributes broadly to the enhancement of people’s health and quality of life. Roche employs some 62,000 people in more than 150 countries around the world. The company has business alliances and R&D relationships with numerous partners, including majority ownership interests in Genentech and Chugai, which are both members of the Roche Group.

Sanofi-Synthelabo..................................................15.18

Scantibodies..............................................................15.14

Serumwerk..............................................................15.36
Serumwerk is a German mid-size company with 300 employees. Serumwerk is specialized in the haemodialysis business and is manufacturing IV-Solutions in PVC-free bags, bloodline sets and bicarbonate cartridges. Serumwerk is also the exclusive partner of NIPRO for the German market.

Shire......................................................................17.28
Shire Pharmaceuticals Group plc (Shire) is a rapidly growing international emerging pharmaceutical company with a strategic focus on four therapeutic areas - central nervous system disorders (CNS), gastrointestinal (GI), oncology, and anti-infectives. Shire also has three platform technologies: advanced drug delivery, lead optimisation for small molecules and Biologics. Shire’s core strategy is based on research and development combined with in-licensing and a focus on eight key pharmaceutical markets.

Sined.................................................................15.08
Sined, manufacturer of biomedical computerized systems (ISO9001-EN46001), is known for advanced solutions in Nephrology and Dialysis. Its main products are: the BedNet™ system for automatic bed monitoring, the MedWare™ Electronic Medical Chart for Nephrology Unit, the SpaceLan™ wireless system for mobility within the hospital, the NetCare™ system for remote ICU monitoring, the Video System™ for remote video monitoring. For information: www.sined.net.

Spire Biomedical...................................................15.06
Spire Biomedical, Inc., manufactures advanced chronic haemodialysis catheters and accessories. The company offers anterograde (Pourchez XpressOTM)
and retrograde tunneled (Pourchez RetrOTM) separated-tip catheters. Both catheters have unique double-“O” lumenal profiles that provide excellent kink-resistance and optimal flow with low arterial and venous pressures. Either product can be inserted using Spire Biomedical’s unique SafeTracTM Sheathless Insertion Kit or with a standard sheath/dilator.

Springer
Springer-Verlag is one of the most important scientific publishing houses worldwide. Its range of publications covers all of the natural sciences with a particular emphasis on medicine. Springer-Verlag publishes the journal Pediatric Nephrology on behalf of IPNA.

Tassinari Bilance
Tassinari Bilance s.r.l. ensures extremely high product quality guaranteed by the Iso 9002 company quality system and the CE mark which accompanies all the systems made in our facility. Weighing beds for nephrology, dialysis, intensive care reanimation, cardiology centres - weighing armchairs for nephrology and dialysis centres - serial interfaces for teledialysis and p.c. links - mobile weighing systems with 4 load cells suitable for any type of hospital bed - scales for surgeries - personal weighing scales - weighing scales and systems in general.

Teraklin
Teraklin is a German company that develops, manufactures and markets the “Artificial Liver” MARS® (Molecular Adsorbent Recirculating System) a unique extracorporeal liver support therapy. MARS® supports the detoxification function of the liver when absent in liver failure. The MARS® treatment was developed for the selective and effective removal of liver toxins from the patient’s blood.

TKT
TKT Europe-5S AB is a European pharmaceutical company that is dedicated to drugs to treat rare genetic diseases. The company has its headquarters in Stockholm, Sweden and is represented in most countries in Europe. The company has a close collaboration with Transkaryotic Therapies Inc. (TKT), a pharmaceutical company based in Cambridge, MA, USA. The Niche Product Platform is based on enzyme replacement for the treatment
of rare genetic disorders, such as Fabry disease and Hunter disease. These conditions belong to a group of disorders characterized by the absence of certain metabolic enzymes. The company’s first product, Replagal® (agalsidase alfa) is a specific enzyme replacement therapy for patients with Fabry disease.

Third World Congress of Nephrology
The Third World Congress of Nephrology is a meeting of the International Society of Nephrology, the Asian Pacific Society of Nephrology and the Singapore Society of Nephrology. It will be held in Singapore on June 26-30, 2005. It will include an exciting scientific programme, a fascinating social programme and an exhibition of state of the art advances in the science and technology of nephrology.

Toray Industries
Toray Industries Inc. Toray, a world leader in polymer and fibre technology, dedicated to the development of products for medical care, present our range of biocompatible hollow-fibre dialyzers: FILTRYZER – created using a combination of fine polymer and advanced hollow-fibre technology using polymethylmethacrylate (PMMA), TORAYSULFONE – a polysulphone dialyzer suitable for high-flux treatment. Also exhibited: TORAYMYXIN – a life saving blood purification device consisting of polymyxin B-immobilized fibre for the treatment of septicaemia.

Transonic
Transonic Systems designs, manufacturers & distributes flowmetering systems and patient monitors for surgeons, nephrologists, biomedical OEM manufacturers and researchers. State-of-the-art products and exemplary customer service are our trademarks.

UpToDate®
Physicians need quick, easy access to practical, reliable answers to their clinical questions. Our physician editors and authors synthesize available clinical evidence and their own experience and judgment to provide precise and concise diagnosis and treatment recommendations. UpToDate is updated every 4 months. Website: www.uptodate.com).
The University Renal Research and Education Association is a not-for-profit organization established for the purpose of collecting information and conducting worldwide epidemiologic, clinical, and economic studies of kidney diseases and organ transplantation. URREA conducts The Dialysis Outcomes and Practice Patterns study (DOPPS), www.dopps.org, which studies dialysis treatment outcomes of ESRD patients, and the Scientific Registry of Transplant Recipients, www.ustransplant.org, which provides outcome information for transplant patients and facilities.

Vifor (International) Inc is a Swiss company specialised in unique iron preparations for human use and is dedicated to the treatment of iron deficiency anaemia. Its main product is the i.v. preparation Venofer (iron sucrose). The absence of dextran gives Venofer an unprecedented safety profile. FDA approved since 2000, Venofer has rapidly become the most prescribed i.v. iron preparation in haemodialysis in the USA.

Wisepress Bookshop is pleased to present a display of publications chosen especially for the World Congress of Nephrology, from many of the world’s leading publishing houses. All the books can be ordered/bought directly from the stand. We will also have a good range of journals on display and sample copies will be available on request.

WCN 2003 - SPONSORS

The organisers of the Congress gratefully acknowledge the support of the following sponsors:

Main Sponsors
(alphabetical order)

Amgen
Baxter
F. Hoffman La Roche Ltd.
Fresenius Medical Care
Fujisawa Gmbh
Gambro Lundia AB
Johnson & Johnson / Ortho Biotech
Membrana
Novartis Pharma AG
Pfizer
Shire Pharmaceuticals Group plc

Sponsors
(alphabetical order)

Abbott Laboratories
Asahi Medical
Braintree Laboratories
B. Braun Medizintechnologie GmbH
Bristol Myers Squibb
Genzyme Therapeutics
Haidylena Medical
Haemopharm Biofluids
Hospal
Idemsa
Medice Pütter
Membrana
Nebo a/s
Orphan Europe
Sanofi-synthelabo
TKT Europe
Toray Industries
Transonic Systems Europe
Wyeth Pharma Gmbh
“KIDNEY MORNING RUN”

to the benefit of the
International Federation of Kidney Foundations

Wednesday, June 11  7.00 – 8.00

Meeting Point: “Mommsen”- Stadion
close to city train stop “Messe Süd, Eichkamp” (S75, S9)

Two routes: approximately 3 and 6 kilometers

The Mommsen-Stadion is located close to the ICC. There are facilities to store belongings, to get changed and to have a shower, so that participants can directly go to the ICC afterwards to attend the plenary session.

Sponsored and organised by Ortho Biotech, Germany

The sponsor will donate • 25 per participant to the International Federation of Kidney Foundations
