GENERAL INFORMATION

• **Goals of the course are:** "metabolic" diagnosis and metaphylaxis of nephrolithiasis, multidisciplinary treatment of renal stones

• **Strategic goal:** to establish in 24 European or Mediterranean hospitals small teams (1 nephrologist, 1 urologist) for the global treatment of nephrolithiasis.

• Only application from couples, a urologist and a nephrologist, from the same hospital will be considered.

• Participating should be less than 45 yrs old.

• They should have a stable position in their hospital. This does not mean having a tenure position, but a contract of at least few years (4-5) in front for allowing they work together for a sufficiently long period.

• Thus, we will not admit trainees since they can move in different hospital at the end of their training.

  We expect to receive the application by February 28 from each couple with their CVs and a declaration of the corresponding heads of department attesting the position of the applicants.

• (please submit application to emanuele.croppi951@gmail.com)
