

Future activities of EUDIAL

B. Canaud, PJ. Blankestijn

European Dialysis Working Group

Planned activities

- Two meetings per year
 - One **working** meeting
 - One **reporting** meeting at the annual ERA-EDTA meeting (Next Paris 2012)

Coordinating activities

- Website access

eudial@era-edta.org

- Network connection of members
- Supported by ERA-EDTA grants

Four major goals of the working group

- Definition and quantification of efficacy
- Safety standards, regulation and guidelines
- Short and long term clinical effects and outcome
- Evidence based and educational issues

Definition and quantification of efficacy

- **Definition**

- HDF vs HD; HF vs HDF
- fluid administration (pre/mid/internal/post-filter)
- fluid quality (autoclaved, sterilized on-line, backfiltered; ultrapure)

- **Dosage, blood purification efficacy and quantification**

- clearance/removal/reduction of marker solutes
- convection volume
- relation to body size...

Safety standards, regulation and guidelines

- **National guidelines/standards/regulations**
 - for water and fluid quality
 - for equipment
- **International guidelines/standards**
 - for water and fluid quality
 - for equipment
- **Practical implementation of standards and monitoring**

Short and long term clinical effects and outcome

- **Clinical effects**

- Acute effects, i.e. intratreatment tolerance
- Short term effects (phosphate, inflammation, nutrition, anemia...)

- **Long term outcomes**

- Quality of life
- Morbidity, hospitalization
- Surrogate parameters (LVMI, DRA)
- Mortality, All cause and cardiovascular

Evidence based and educational issues

- Collecting and sharing educational material
- Ensuring and disseminating scientific literature survey
- Establishing best practice recommendations
- Promoting prospective trials

Additional missions

- Organizing and pooling prospective studies
- Coordinating activities with different working groups (**EUTOX** and **EURECA**)
- Coordination with **KDIGO**
 - Innovative dialysis modalities

Working Group Meeting (pre-KDIGO)

13 October 2011 - Paris

Plenary opening - brief introduction on objectives of meeting

Break out groups (lead elected + 5 active member) on suggested areas :

- 1. Definition and quantification of efficacy**
- 2. Safety standards, regulation and guidelines**
- 3. Short and long term clinical effects and outcome**
- 4. Evidence based and educational issues**

Working Group Meeting

How it will work ?

- One working day meeting
- Four topics
 - Lecture introducing the subject (by leader)
 - Breakout working sessions
 - Summary reporting session
- Selection of scientific literature related to topics
- Questions to be answered during the breakout sessions
- Manuscript prepared and circulated to members for amendment and approval
