General discussant: *C. Ponticelli*

Chairs: *L. Gesualdo, G.M. Ghiggeri*

14.00-14.40

Innate Immunity as trigger of renal damage.
Focus on complement activation in glomerular diseases
(M. Daha)

14.40-15.10

Activation of complement in humoral rejection
(H. Regele)

15.10-15.30 Discussion

Chairs: *A. Amore, M.P. Rastaldi*

15.30-16.00

Toll-like receptors activation and glomerular diseases
(J.H. Anders)

16.00-16.30

Role of dendritic cells in glomerular diseases and renal transplantation
(G. Castellano)

16.30-17.00 Discussion

Chairs: *F. Ferrario, S. Sandrini*

17.00-17.30

B cells and antibody network in glomerular diseases.
The case of membranous nephropathy
(P. Ronco)

17.30-18.00

B cells and antibody network in renal transplantation
(E. Cozzi)

18.00-18.30 Discussion

May 25th 8.00- 13.00

Therapeutical approaches to glomerular diseases and renal graft dysfunction

Chairs: *F.P. Schena, F. Scolari*

8.00-8.20

NFkB and proteasome modulation of transcription factors in glomerular diseases and renal transplantation
(R. Coppo)

8.20-8.40

Suppressors of Cytokine Signalling (SOCS): a new therapeutic target
(J. Egido)

8.40-9.10

Growth factors: Biomarkers and therapeutic targets
(T. Ostendorf)

9.10-9.40 Discussion

Chairs: *P. Messa, L. Cagnoli*

9.40-10.10

Proliferation signal inhibitors in nephrology and renal transplantation
(J. Campistol)

10.10-10.40

2° signal blockade in transplantation and renal diseases
(J. Grinyo)

10.40-11.10 Discussion

11.10-11.30 Coffee break

Chairs: *G. Moroni, E. Bertoni*

11.30-12.00

B cells inhibition in glomerular diseases
(D. Jayne)

12.00-12.30

B cells and antibody network inhibition in renal transplantation
(M. Salvadori)

12.30-13.00 Discussion
