All simple, quick reliable dip-and-read tests ready for use wherever medicine is practiced

In all circumstances where Urinalysis is important, whether diagnostically or for routine control, AMES Reagent Strip Tests are invaluable. They are all carefully standardised, thoroughly reliable, extremely simple to use and very quick; not only do they save technician time, but they require no equipment and where necessary can be carried out by the patient himself.

In the renal field, we particularly highlight:

**Hema-Combistix**
Reagent Strips — test one specimen of urine for pH, glucose, protein and blood.

**Uristix**
Reagent Strips — test for protein and glucose in urine.

**Albustix**
Reagent Strips — test for protein in urine.

**Hemastix**
Reagent Strips — test for blood in urine.
