This picture represents a view in the Haemodialysis Laboratory of the Amsterdam Municipal University [Wilhelmina Hospital, Amsterdam-W].

The laboratory was completely installed by our firm with Huizenga furniture. We also furnished a Hawksley microhaematocrit centrifuge, an EEL prothrombine meter, an EEL chloride meter, Schwarzer physiological recording apparatus, a Winston blood pressure follower, Telemedics apparatus for wireless transmission of physiological phenomena and an Ellab electrical thermometer.

Among our further items for haemodialysis laboratory use we mention centrifuges, ion exchangers, colorimeters, pH-meters and all sorts of glassware.

We will be glad to send fully detailed documentation.
