INSTRUCTIONS TO AUTHORS

The acceptance of a paper for presentation at a Congress means that the paper will be published. Authors are not entitled to withdraw papers after presentation. Failure to observe the instructions may lead to rejection of the paper.

The essence of publishing conference proceedings such as this is SPEED. Please do all you can to meet the deadlines set by your Editor. It will also help if the following basic rules of style are followed.

Address of the Authors
When an article comes from two or more institutions it is important to indicate which author comes from which hospital.

The Manuscript
The original and one copy of the manuscript must be sent. Each should contain a complete set of figures and tables. If the original manuscript is not sent, the Editor reserves the right to refuse publication without further discussion with the author. The original article must be typed in double spacing with 5cm margins.

References
In the text If there are one or two authors please quote both names and year of publication. When there are three or more authors quote the name of the first and add ‘et al’ and the date of publication. Examples:

...... (Waddell & Butler, 1957); by Waddell and Butler (1957) ......
...... (Asatoor et al, 1965); by Asatoor et al (1965) ......

In the bibliography Please quote all the authors (each followed by his initials), the year of publication followed by the name of the journal in full, volume number and the page number of the first page of the article. Examples:

Waddell, W J and Butler, T C (1957) Journal of Clinical Investigation, 36, 1217

All references have arabic numbers, with the exception of the volume number of the Lancet, which is printed in roman.

All references in the bibliography to be in alphabetical order.

638
The accuracy of references will be the responsibility of the author. The editorial office will not carry out a further check, except that references quoted in the text but not in the bibliography, and vice versa, will be deleted.

**Spelling**
Follow the Concise Oxford Dictionary, i.e. haemodialysis, oedema, dialyser, uraemia, etc.

**Abbreviations**
No full stops between capitals, e.g. WHO, USA, EDTA, MM, MNCV etc.
No full stops after gram(s), kilogram(s) etc, e.g. g, kg, mg/kg/day.
Figure is always written in full, never Fig.
Can’t, won’t, didn’t etc are always written out in full: cannot, will not, did not.

**Length**
Contributions should not exceed 2500 words. Large tables and figures count 250 words against the total. If this length is exceeded, the Editor reserves the right to delete excess material.

**Illustrations**
The quality of illustrations printed depends entirely on what contributors submit. Please note the following:

**Size** When reproduced the width should not be more than 11.4 cm and the depth 18 cm.

**Labelling** Digits and words in a table, figure or diagram must be neat and legible. Remember that the figures may have to be reduced in size to fit the page area given above. Decimal points must be written as 9.7, not 9,7.
Photographs should be black and white glossy prints, not copies taken from journals, and not photocopies.
Illustrations must not be mounted in the text, but submitted each on a separate sheet and given a figure number which accords with the order in which it appears in the text. These are numbered in arabic.
Each illustration must be labelled with the name of the contributor, its figure number, and, if necessary, an indication of top and bottom.

**Captions** These should be as brief as possible and listed separately, each being preceded by its figure number.

**Tables** Use roman numbers for these.
Acknowledgments
Authors are responsible for ensuring that any acknowledgments necessary are included in their manuscripts.
Please insert these at the end of the paper, before the reference list.

Proofs
Proofs are not sent to authors: the Editor takes full responsibility for corrections and deletions.
