SUBJECT INDEX

A

acidosis
  on Giovannetti diet, 88, 89
acute tubular necrosis
  anabolic phase, 378
  post-traumatic, 383
  subsequent renal function, 255
allopurinol
  in renal failure, 8
aluminium hydroxide
  for metastatic calcification, 33
antigenic strength
  mixed spleen cell reaction, 214
arsenic
  blood and muscle, effect of dialysis, 38
artificial kidney
  see Kidney, artificial
azotaemia
  see Uraemia

B

business meeting
  minutes, 392

C

calcium
  deposition in cornea, 24
  metabolism during RDT, 17, 28
  ultrafiltrable, 17, 28

carbon
  activated carbon slurry, 375
charcoal
  deposition in tissues, 352
  regeneration of dialysis fluid, 262, 265, 375
constitution
  of EDTA, 394

council resolution
  planning dialysis units, 396

cortical necrosis
  late recovery, 349

cross circulation
  reactions in donor, 253, 254
  treatment of uraemia, 247

D

dialysis
  see Haemodialysis
  Peritoneal dialysis
Regular dialytic treatment
dialysis fluid
  heating and distributing system, 373
regeneration from charcoal, 262, 265, 375
diet
  calorie supplementation by dialysis, 313
  low protein, high essential A.A., 81
DTPA
dialysance, 48
treatment of haemosiderosis, 43

e
electromyography
  in uraemic subjects, 35

F

fibrinolysis
  effect of peritoneal dialysis, 53
  use in declotting shunts, 310

G

glomerulos
  technique for RDT, 275

H

haemodialysis
  controlled urea removal, 303
  development of a large centre, 117
  fast and slow, 282
  glucose transport, 383
  haemodynamic effects, 75
  heparin dosage, 309
  hyperkalaemia, treatment of, 381
  in series, 341
  kinetics of urea diffusion, 290
  monitorisation, 308
  thermo-osmotic effect, 299
  trends during 10 years, 330
haemoperfusion
  charcoal embolism, 352
haemosiderosis
  treatment with DTPA, 48
hyperkalaemia
  between dialyses, 381
hyperatraemia
  during peritoneal dialysis, 357
hypertension
  nephrectomy for, 65
  salt and water restriction, 72

I

intermittent haemodialysis

see Regular dialytic treatment
ion-exchange resins
  for hyperkalaemia, 381

K

kidney, artificial
  efficacy-comparison of A.K.'s, 340
  Hoelztenbein coil, 390
  Kill: comparison with twin coil, 312
    - distribution system, 373
    - series dialysis, 341
  monitoring, 308, 319
  twin-coil - comparison with Kill, 312
    - mingle pass dialysis, 315
    - ultrafiltration, 299
  twin minicoil, 322
kidney preservation
  cold perfusion, 236, 241
  gas cooling, 245

L

leukaemia
  cross circulation with uraemic patient, 247
lung function
  in uraemia, 58

M

mingle pass dialysis
  dialysis fluid requirements, 315
mixed lymphocyte culture
  quantitative assay, 198

N

nephrectomy
  for hypertension, 65
nephrology
  need for recognition, 122
neuropathy
  sex incidence, 42

O

oxalosis
  in uraemia, 9

P

parathyroid hyperplasia
  in patients on RDT, 32
peritoneal dialysis
SUBJECT INDEX

automatic system, 362, 366

cannula stabiliser, 329
effect on fibrinolysis, 53
extrarenal indications, 355
hypernatraemia during, 357
with recirculation dialysis, 270

potassium
serum levels in uraemia, 381

potato diet
for renal failure, 368

publicity
use in fund-raising, 124

pulmonary diffusing capacity
in uraemia, 58

R

regular dialytic treatment
calcification of cornea, 24
calciyum metabolism, 17, 28
clinical results, 98, 102, 107, 111
cost, 143, 135
development in Sweden, 149
development in U.K., 153
development in U.S.A., 96, 156
fast and slow dialysis, 282
glomerulos technique, 275
home haemodialysis, 126, 132, 135
needs for treatment, 138
nurse-patient operated unit, 98

proportioning system for
single patient, 319
relation to transplantation, 161, 162
report on RDT in Europe II, 90
selection of patients, 146
renal biopsy
in acute renal failure, 391
renal failure
see Uraemia
Acute tubular necrosis
renal function
after cortical necrosis, 349
after tubular necrosis, 255
renal transplantation
see Transplantation

double donation, 207
leucocyte grouping, 202
mixed lymphocyte culture, 198
mixed spleen cell reaction, 214
report of European experience II, 168
RDT – relation to transplant, 161, 162
–, influence on results, 167
ureteric fistula, 196
vascular response in rejection, 220

skin: induced tolerance in newborn mice, 208

S

shunts, arterio-venous
streptokinase therapy, 310
technique of insertion, 337

T

transplantation
hepatic, 225
renal: ABO incompatibility, 206
cadaveric, technique and results, 192
– problems, 185
– clinical results, 173

U

uraemia
anabolic phase after acute
renal failure, 378
arsenic metabolism, 38
cross circulation with ir-
radiated leukaemic, 247
oxalosis, 9
pulmonary function, 58
relation of uric acid to
symptoms of, 3
treatment – by cross circu-
lation, 247
– by Giovannetti diet, 81
– potato diet, 368
– needs for, 138

398
