SUBJECT INDEX
(prepared by R. Walter Elliott, M.D., Newcastle-upon-Tyne)

A
acid-base balance
on peritoneal dialysis, 150, 430
on R.D.T., 211
acute renal failure
delayed polyuric phase, 297
gastro-intestinal haemorrhage, 301
radiographic investigation, 437
arterio-venous shunt and fistula
see Fistula and Shunt, arterio-venous
artificial kidney
see Kidney, artificial
azotaemia
see Uræmia

B
barbiturate poisoning
haemodialysis, 293
blood clotting
see Coagulation
body composition
on R.D.T., 216
business meeting
Minutes, English, 442
-, French, 444

C
clot screw
for A-V shunt, 363
coagulation
during R.D.T., 269
coil
see Kidney, artificial

desferrioxamine
267
dialyser
see Kidney, artificial
dialysis
see Haemodialysis
Peritoneal dialysis
R.D.T.
dialysis fluid requirements
405
donor selection
see Transplant

E
crithropoietin
after transplant, 197

F
fistula, arterio-venous
circulatory effects, 50, 73, 78
experience with, 73, 78, 86, 91
fibrin tunnel for, 359
in preparation for transplant
operative technique, 78, 91

G
gastro-intestinal haemorrhage
during acute renal failure, 301

H
haemochromatosis
prevention of, 267
haemodialysis
see also R.D.T.
barbiturate poisoning, 253
cephaloridine levels, 425
monitoring, 355, 383
recirculation and minge pass,
400, 405
ultrafiltration rate, 128, 134,
386, 416
urea transport in R.B.C.'s, 250

I
intermittent dialysis
see R.D.T.
iron
overload, 267
therapy, 12, 17

K
kidney, artificial
Babb-Grimrard, 114
crona-coil, twin-coil, 128,
386
concentric coil, 124
tuer-coil home built, 392
glomerulus, 124
Kiln - re-use, 30
-, rinsing, 377
-, sterilization, 381
metal coil, 397
parallel flow (S.O.G.R.E.A.H.),
78
twin minicoil, 35
ultraflow, 128, 400

L
leucocyte groups
171
lymphocyte transfer test
189

M
magnesium
metabolism on R.D.T., 224,
285
membranes
new for dialysis, 98
permeability measurements,
101
supports, 107, 128
minicoil (twin)
35
mixed lymphocyte culture test
189

N
nerve conduction
in uræmia, 279
relation to magnesium, 224,
285

P
peritoneal dialysis
acid-base regulation, 150, 430
automated, 412, 416
for chronic renal failure, 136,
136
iso-otic dextan, 141
lacteacidæmia, 150
replaceable prosthesis, 136
selectivity of protein loss, 146
permeability measurement
101
platelets
function during R.D.T., 269
polycystic kidney
freedom from anaemia, 264
pulmonary œdema
blood gas status, 430
pump, blood
prevention of arterial suction,
78

R
regular dialysis treatment
(R.D.T.)
effects on metabolism
acid-base, 211, 231
body composition, 216
creatinine, 231
folate, 15
| glucose, 257 |
| insulin, 257 |
| iron, 12, 17, 267 |
| lipids, 257 |
| magnesium, 224, 285 |
| phosphate, 231 |
| urea, 231, 240, 245 |
| uric acid, 231 |
| vitamin B₁₂, 15 |

regular dialysis treatment (R.D.T.)

S

shunt, arterio-venous

S.O.G.R.E.A.H. kidney, 78
transfusion requirements, 12, 17, 264

S

all-silicone, 39
anticoagulants, 55, 61, 369, 373
clotting
histology, 369
removal by PVC tube, 366
removal by screw, 363
removal by Seldinger wire, 366
streptokinase therapy, 55, 61
infection, 67, 86, 373
ointment therapy, 373
pressure-flow relationships, 43, 61
survival, 43, 91, 369, 373

sweat urea

433

T

test cell (dialyser)

107
tissue typing

see Transplantation

transplantation

annual report, 205
cadaver, 86, 201
changes in lymphocyte excretion, 341
donor selection, 189
Fanconi syndrome, 197
initial function, 193
osmotic diuresis, 193
pathophysiology with immunosuppressives, 335
plasma renin activity, 347
tubular acidosis, 197

transfusion

R.D.T. without, 12, 17
twin minicoil, 35

U

uraemia
effect on sweat urea, 433
pulmonary oedema, 430

urea

and tritium space, 240
in sweat, 433
metabolism on R.D.T., 231, 240, 245
transport by R.B.C.'s, 250
turnover, 240
