

## SUBJECT INDEX

Prepared by R. Walter Elliott, M.D., Newcastle upon Tyne

- A**
- absorbent zirconium phosphate**
    - in R.D.T., 86
  - acute renal failure**
    - furosemide, 241
    - in patients with haemophilia, 348
  - anaemia**
    - in maintenance dialysis, 64
  - angiotensin and renin activity**
    - in patients on R.D.T., 197
  - antigens**
    - recognition of transplantation, 116
  - antilymphocyte serum**
    - in human transplantation, 140
    - and rejection, 133
  - antilymphocytic globulin**
    - in transplantation, 384
  - arterio-venous fistula**
    - 10, 391
- B**
- blood flow measurement**
    - in dog kidney, 258
  - blood loss**
    - in Kiil dialyser, 181
  - bone disease**
    - control by R.D.T., 300
    - on R.D.T., 408
- C**
- cadaveric transplantation**
    - results, 13
  - calcium dialysate requirements**
    - on R.D.T., 288
  - calcium metabolism disturbance**
    - in chronic renal failure, 296
  - cardiovascular effects**
    - of Cimino-Brescia fistula, 398
  - cephalotin concentration**
    - during haemo- and peritoneal dialysis, 353
  - charcoal column perfusion**
    - in treatment of poisoning, 320
  - cholestasis**
    - due to anti-emetic treatment on R.D.T., 324
  - chronic renal failure**
    - furosemide, 241
  - Cimino-Brescia fistula**
    - 391
  - corticosteroids**
    - in immunosuppression, 388
  - cytomegalovirus infection**
    - following transplantation, 278
- D**
- data processing**
    - in a renal unit, 311
  - de-airing**
    - of dialysis fluid, 314
  - dietary reversal**
    - of carbohydrate intolerance, 205
  - disequilibrium**
    - between body compartments 102
  - disinfection**
    - of dialysate system with diethylpyrocarbonate, 333
  - documentation**
    - of R.D.T., 350, 377
  - donors**
    - for transplantation, 12, 390
- E**
- erythropoiesis**
    - in R.D.T., 172
- F**
- folate levels**
    - on R.D.T., 174
  - furosemide**
    - in acute and chronic renal failure, 241
- G**
- glomerulonephritis**
    - acute oliguric, 252
- H**
- haemodialysers**
    - Alwall disposable, 18
    - assembly test of Kiil, 337
    - compact coil kidney, 340
    - cuprophane cartridge, 38
    - disinfection with diethylpyrocarbonate, 333
    - disposable Kiil insert, 30
    - foam-free disinfection, 363
    - Hoelzenbein rewindable coil, 28
    - MiniKiil, 35
    - MiniKlung, 35
    - no-prime, no-blood-loss dialyser, 316
    - parallel narrow cellulose tubes, 358
    - pumpless for home use, 372
    - pumpless parallel flow, 21
    - regeneration service, 366
    - residual blood loss, 181
  - haemodialysis**
    - cephalotin concentration during, 353
    - of contrast media following aortography, 329
    - effect on antibiotic levels, 158
    - effect on thyroid function, 226
    - in haemophilia A, 348
    - maintenance prior to transplantation, 61
  - haemoperfusion**
    - of a charcoal column in the treatment of poisoning, 320
  - hard water syndrome**
    - 284
  - hepatitis**
    - 7
  - home haemodialysis**
    - centres and patients in Europe, 6
    - Cimino-Brescia fistula, 395
    - equipment, 56
    - pumpless haemodialysers, 372
    - regeneration service of haemodialyser, 366
  - hyperparathyroidism**
    - on R.D.T., 417
  - hypertension**
    - in maintenance haemodialysis, 63
- I**
- immunosuppressive therapy**
    - in renal transplantation, 383
  - Imuran**
    - in renal transplantation, 386
  - intermittent dialysis**
    - see R.D.T.
  - iron metabolism**
    - in R.D.T., 167

SUBJECT INDEX

- iron responsive anaemia**  
on R.D.T., 179
- irradiation**  
of extracorporeal blood in transplantation, 125  
in immunosuppression, 389
- L**
- LDH**  
in renal cadaveric transplantation, 270
- live donor transplantation**  
results, 13
- M**
- membranes**  
cellulose-based, 74  
nephrophane, 78
- mortality**  
of R.D.T. patients, 4
- N**
- nephrophane**  
variation of cellulose membrane, 78
- P**
- peritoneal dialysis**  
cephalotin concentration during, 353
- peritoneal dialysis system**  
automatic, 344
- phenolic compounds**  
concentrations on R.D.T., 213
- poisoning**  
haemoperfusion through a charcoal column, 320  
treatment by dialysis, 246
- R**
- R.D.T.**  
cholestasis due to anti-emetic treatment, 324  
complications, 8  
concentration of single phenolic compounds, 213  
control of bone disease, 300, 405
- disequilibrium between body compartments, 102  
documentation of, 350, 377  
endocrine status, 230  
erythropoiesis, 172  
hard water syndrome, 284  
iron metabolism, 167  
iron responsive anaemia, 179  
psychological and psychiatric observations, 67  
rehabilitation, 9  
renin and angiotensin activity, 197  
renin levels, 186, 193  
report on R.D.T. in Europe. IV, 3  
social and psychological aspects, 97  
studies on dialysate calcium requirements, 288  
zirconium absorbent, 86
- regeneration service**  
for home and hospital dialysers, 366
- rejection**  
blood renin levels, 190  
effect of antilymphocyte serum, 133  
with pre-existing humoral antibodies, 128
- renin and angiotensin**  
in patients on R.D.T., 197
- renin assays**  
in R.D.T. and medical treatment, 193
- renin levels**  
in haemodialysis and transplantation, 186
- round table discussions**  
calcium metabolism in transplanted and R.D.T. patients, 404  
Cimino-Brescia fistula, 391  
documentation of dialysis, 377  
immunodepressive therapy in renal transplantation, 383
- S**
- shunts**  
declotting with thrombolytic agent, 50
- injection site, 313  
reduction of clotting, 46  
ultra-thin-walled vessel tip, 370
- T**
- thoracic duct drainage**  
in immunosuppression, 389
- thyroid function**  
effect of haemodialysis, 226
- transplantation**  
annual report 1968, 12  
antigens, 116  
blood renin levels, 189  
causes of failure, 13  
cytomegalovirus infection, 278  
facilities in Europe, 11  
irradiation of extracorporeal blood, 125  
LDH in cadaveric, 270  
maintenance haemodialysis prior to, 61  
of R.D.T. patients, 5  
results of use of antilymphocyte globulin, 140  
second grafts, 14  
significance of ischaemia, 264  
tissue typing, 15
- U**
- uraemia**  
dietary reversal of carbohydrate intolerance, 205  
renin levels, 186, 193  
symptoms induced with creatinine and methylguanidine, 219
- V**
- vessel tip**  
ultra-thin-walled, 370
- vit. B<sub>12</sub> levels**  
on R.D.T., 174
- Z**
- zirconium phosphate absorbent**  
86
