Subject Index

A
acute glomerulonephritis
  severe oliguric, 203
acute renal failure
  in severe acute glomerulonephritis, 203
  intravenous excretion urography, 537
  plasma renin levels, 542
adsorption
  of dialysate, 385
age
  effect on results of transplantation, 235
air
  monitor in RDT, 412, 456, 482, 488
aluminium
  in renal osteodystrophy, 139
aminoacid
  administration during RDT, 182
anaemia
  effect on cardiopulmonary function, 101
  in patients on RDT, 81, 93
angiography
  of kidney donors, 561
  prior to shunt surgery, 514
antilymphocyte globulin
  350
anti-macrophage serum
  279
arteriovenous fistulae
  clotting of, 546
  infections in, 530
  in paediatric domestic dialysis, 65
  planning, use of angiography, 514
Australia antigen
  see hepatitis

B
blood damage
  in dialysers, 373, 450
blood detector
  488
blood loss
  in dialysers, 365, 401, 405, 437, 441, 453, 472, 501, 568
blood pump
  monitoring necessary, 412, 456, 482, 488
bone biopsy
  in patients with renal failure, 122, 131, 139, 149
bone disease
  see osteodystrophy

C
calcium
  mobilisation by heparin, 115
cannulae
  see shunts
carbenicillin
  in patients on RDT, 530
cardiac output
  during RDT, effect on anaemia, 101
charcoal
  385
chemisorption
  385
children
  A-V fistulae in, 65
  chronic renal failure in, 211
  dialysers for, 370, 501
  RDT in, 3, 211, 501, 505
  shunts in, 505
  transplantation in, 211
chronic renal failure
  anaemia in, 101
  chemical composition of bone, 139
  effect on blood coagulation, 546
  in children, 211
  lipid metabolism in, 174
  mortality rate, 326, 348
  plasma hydroxyproline, 122
  renin in plasma, 542
  thyrotropin releasing hormone, effect of, 161
  see also regular dialysis treatment
computer
  for dialysis data, 3, 34, 42, 533

data
  computer processing, 3, 34, 42, 533
data chart
  for RDT, 533
diafiltration
  384
dialysance
  distortion by ultrafiltration, 460
  in Ab Gambro dialyser, 364, 437
  in capillary film dialyser, 479
  in counter current coil-dialyser, 441
  in disposable flat bed dialysers, 364, 401, 437, 493
  in high performance flat bed dialysers, 476
  in hollow fibre dialyser, 568
  in Kiil dialyser, 364, 401, 405
  in 'mingle pass' pot, 472
  in Rhône Poulenc dialyser, 364, 401, 437
  in Ultraflo coils, 364
test cell, 416

579
high performance, 476
hollow fibre, 366, 568
infants, for, 501
Kill, performance evaluation, 366, 405, 421, 476
membrane envelopes, 405, 493
membrane support, 416, 476, 484
performance comparison, 366, 401, 421, 437, 501
re-use, 370
Rhône Poulenc, 366, 401, 437, 460
sterilisation of, 189
ultrafiltration in, 366, 401, 421, 460
Ultraflo coils, 366

haemodialysis
blood sampling, 426
mathematical model, 436
membranes, 382, 389, 428, 445
proportioning system, 407, 418

heparin
in treatment of hepatic failure, 198
mobilisation of calcium and phosphate, 115

hepatic coma
liver perfusion, 198

hepatitis
and anaemia, 81
and renal transplantation, 3, 189
and regular dialysis treatment, 3, 81, 189
Edinburgh epidemic, 189
with hepatic coma, 198

home RDT
mortality, 3

hydroxyproline
in plasma, 122

hypercoagulability
in chronic renal failure, 546

hyperparathyroidism, 2
during RDT, 131, 149

hypersplenism
during RDT, 81

hypertension
renin levels during dialysis, 542

immunoglobulins
81

immunosuppression
349
by antilymphocyte globulin, 350
by antinuclear globulin, 279
intra lymphatic radioactive gold, 286

infection
during RDT, 530

intravenous urogram
in acute renal failure, 537

ischaemic time
effect on transplant function, 307, 330
K

kidney
storage, 293, 298, 307, 313, 330, 553

Kil
see haemodialysers

L

leucocytes
energy metabolism during rejection, 245

leucopenia
during RDT, 81

lipaemia
during RDT, 174

liver perfusion
for hepatic coma, 198

lymphocytes
in peripheral blood during rejection, 270

M

membranes
biocompatibility, 382, 445
evaluation, 389, 418, 428, 445
support systems, 416, 476, 484

metastatic calcification
115, 131

microcapsules
385

mixed lymphocyte culture
439

monitors
air bubble, 412, 456, 482, 488
blood leak, 488

mortality
during RDT, 3
following transplantation, 3, 223, 229, 230

N

neutron activation
of bone, 139

nitrogen balance
during RDT, 182

O

osteodystrophy
bone biopsy, 122, 131, 139, 149
in chronic renal failure and RDT, 106, 115, 122, 131, 139, 149
radiological findings, 131

ozone
sterilisation of dialysate, 499

P

parathormone
blood levels during RDT, 131

peptides
in blood during RDT, 167

perfusion
of kidneys, 293, 298, 307, 313, 330, 553

peritoneal dialysis
gastric acid in, 410
simple automatic machine, 468

phosphate
deficiency during RDT, 106

plastic valves
for dialysis, 521

platelets
loss in dialysers, 373

pregnancy
during RDT, 3, 74
following transplantation, 3

preservation of kidneys
307, 313, 330, 393, 398, 553

proteinuria
selectivity after renal transplantation, 237

psychosocial adjustment
to RDT, 28

R

reactive lymphocyte blastogenesis
270

regular dialysis treatment
access to circulation, 65, 210, 505, 510, 517, 521
anaemia during, 81, 93, 101
antibiotic treatment, 530
arteriovenous fistulae, 65, 514
blood loss with dialysis, 365
cardiopulmonary function, 101
children, 3, 65, 211, 377, 505, 510
computer for data, 3, 34, 42, 533
data chart for, 533
death, causes of, 3
diseases requiring, 3, 211
duration and frequency, 3, 436, 464, 526
essential amino acids, and, 182
fluoride in serum, 149
following transplantation, 3
growth hormone response during, 161
hepatitis during, 3, 189
hydroxyproline in plasma, 122
hypersplenism, 81
in home, 3, 65
in hospital, 3
in infants, 501, 505
infection, and, 3, 530
leucopenia, 81
lipaemia, 174
metastatic calcification in, 115, 131
mortality during, 3
osteodystrophy, 122, 131, 139, 149
patient’s eye view, 50
peptides in blood, 167
phosphate deficiency during, 106
political and financial considerations, 360
pregnancy during, 3, 74
radial artery, repeated puncture, 517
rehabilitation during, 3, 28
renin levels during treatment, 542
shunts, fistulae, etc., 65, 210, 505, 510, 514, 517, 521
splenectomy, 81
statistics and planning, 3, 34
thrombocytopenia, 81
thryotropin releasing hormone, effect of, 161
total flowmeter, 464
transfusion during, 81
ultrafiltration, 365, 421, 460
rehabilitation
following transplantation, 3
on RDT, 3, 28
renal transplantation
adenine nucleotides in tissue after preservation, 313
Australasian survey, 223
children, in, 211
death, causes of, 3, 230
diseases requiring, 3, 211, 223
donors for, 3, 329, 561
electrolytes in tissue after preservation, 513
failure, causes of, 3
function of graft, 223, 237, 265, 556
hepatitis, and, 3, 189
immunosuppression, 279, 286, 349
infections following, 3, 221, 230, 266
intralymphatic 198Au in, 286
kidney storage for, 293, 298, 307, 313, 314, 553
macrophage migration, inhibition of, 356
matching, effect on results, 333
mixed lymphocyte culture, 339
monitoring patients with, 258, 270, 354, 356
mortality following, 3, 223, 230
nutrition during, 221
oliguria following, 550, 565
organisation of services, 344
pregnancy after, 3
proteinuria after, 237
rehabilitation following, 3, 223
rejection
diagnosis, 270, 354
metabolism of leukocytes, 245
renography after, 258
results
effect of blood transfusion, 3
with cadaver donors, 3, 223, 230, 307, 335, 340, 351, 352
with live donors, 3, 339
scintiphotography after, 258
statistics and planning, 3, 34, 326, 344, 348
tissue typing, 3, 334
tubular function after, 556
urological complications, 252, 550
renin
effect of dialysis on plasma levels, 542
renogram
after renal transplantation, 258

S
shunts
alternatives, 65, 517, 521
angiography, 514
declothing, 510
paediatric, 505
splenectomy
during RDT, 81
superficial femoral artery
plastic valve for dialysis, 521

T
thrombocytopenia
during RDT, 81
thrombosis
in hollow fibre dialysers, 203
on dialysis membranes, 372, 445, 450
thyroid stimulating hormone
161
thyrotropin releasing hormone
161
tissue typing
3, 334
transplantation
see renal transplantation
triglycerides in RDT
174

U
ultrafiltration
365, 421, 460
in Ab Gambro dialysr, 437
in capillary film artificial kidney, 479
in countercurrent coil dialysr, 441
in disposable Klü dialysr, 493
in high performance flat bed dialysr, 476
in hollow fibre dialysr, 568
in melle pass pot, 472
in Rhône Poulenc dialysr, 401, 437
uraemia
see acute renal failure
see chronic renal failure
urological complications
of renal transplantation, 252, 550
