In 2012 and 2013 the WGIKD working group published a call for members of the WGIKD working in an academic institution in Europe, with the aim to promote clinical or basic projects pertinent to patients with inherited kidney disorders. The grant is meant to provide an impulsion for a promising study in that area.

A total amount of EUR 95'000 has been granted to the following projects in 2012 and 2013:

- **Prof. F. Emma** (Rome), on behalf of a European Network of Pediatric Nephrologists: "European cohort of children with ADPKD": 5000 euros (2012)
- **Dr. Daniel Gale** (London): "Genetics of CKD in Cyprus": 15,000 euros (2012)
- **Dr. Andrew J. Streets** (Sheffield): "microRNAs in ADPKD": 15,000 euros (2012)
- **Dr. Alessandro Luciani** (Zurich): "Phosphoinositide metabolism and endocytic trafficking in Dent Disease": 20,000 euros (2013)
- **Dr. T. De Groot** (Nijmegen): "Acetazolamide as a treatment for congenital nephrogenic diabetes insipidus": 20,000 euros (2013)
- **Dr. F.J. Arjona Madueño** (Nijmegen): "Identification of new magnesiotropic genes explaining inherited renal Mg2+ transport disorders": 20,000 euros (2013)
