The 10th International Podocyte Conference, the most respected and influential international conference in the field of podocyte study, will bring together renowned researchers from around the world on June 4-6, 2014 in Freiburg, Germany. The focus of the conference is on current and future advances in the area of experimental and clinical podocyte diseases. Glomerular diseases remain the leading cause of kidney disease. The goal of the 2014 conference is to share the latest clinically relevant research on kidney podocytes. For additional information about the conference, the call for papers, and registration, please visit the website.
