# New content from ERBP

ERBP is working hard to bring you new and updated guidance on several topics. Topics in the pipeline include more on vascular access, hyperkalaemia, obesity in transplantation (in collaboration with the ERA-EDTA DESCARTES Working Group) and intravenous iron.

We are also proud to announce ERBP's newest topic on our future work plan that results from an open call to explore, understand and evaluate topics that are essential to our most important stakeholders: Benefits and harms of exercise training in people with chronic kidney disease.
