Peritoneal dialysis: 106 (13.5%)
Total: 788
Cyprus has one of the highest rates in Europe of new patients pmp that start RRT every year.
Cyprus has one of the highest rates in Europe of new patients pmp that start RRT every year.

Causes:

• High life expectancy in Cyprus (80.7 years vs 79 years mean European LE)

• High incidence of diabetes and hypertension

• Higher incidence of inherited kidney diseases (ADPKD, Medullary Cystic Kidney Disease, TBMN, CFHR5)

• “Dialysis for All” policy: everyone is provided the option for dialysis (30% of pts that started dialysis in 2017 were 75+yo, the older being 99 yo.)
