Lithuanian Nephrology, Dialysis and Transplantation Association  
(LNDTA)

Main activities:
1. Optimisation of nephrological service and participation in working groups;
2. Continues medical education of members of association, family doctors and internists, nurses (seminars, conferences, congresses, workshops);
3. Coordination of scientific investigations;
4. Cooperation with other public organisations (specialists, nurses, patients) in Lithuania and with other national and international organizations.

Between congresses we organize meetings of the Association board (3-4 times per year) and work in committees, when specific problems originate.

Some interesting traditions:
1. Since 1992 every 2 years nephrological associations of Latvia, Lithuania and Estonia are organizing joint conference with participation of famous European experts nephrologists. In June 12-14, 2014 the 12-th conference will be held in Dubingiai (Lithuania).
2. World Kidney Days: printing and dissemination of educational materials (many thousands) for general population, nephrologists, nurses, and lectures, articles in newspapers, interview on TV and finally – joint national conference for doctors, nurses and patients (lectures in 3 sections and one – all together). Number of participants – from 200 till 500.
3. Seminars for dialysis engineers: we have 26 dialysis engineers in our association, and there they deepen knowledge in medical aspects of dialysis.

Summary: Now we have 274 members. Our association already organized 32 educational conferences for nephrologists, 13 – for family doctors and internists, 14 – for nurses, 4 – for dialysis engineers. We prepared very detailed local recommendations for dialysis service, kidney transplantation and treatment of anemia, hyperphosphatemia, secondary hyperparathyroidism. We translated, published and introduced international KDIGO guidelines on AKI, renal anemia, glomerulonephritis, CKD.

Short description of the Society (preferably no more than 2000 characters)

Lithuanian Nephrology, Dialysis and Transplantation Association (LNDTA) is a nonprofit professional organization,
seeking to coordinate clinical practice, research and education activities in the field of nephrology in Lithuania. LNDTA was
founded in 1992 and is formed of individuals only – full members (nephrologists, pediatric nephrologists, other specialists
working in the field of dialysis and renal transplantation, renal pathologists). Every three years LNDTA holds meetings as a
forum for its members to communicate freely, to co-operate actively and to achieve consensus on standards in nephrology according to local needs and opportunities. Proceedings of meeting are published in supplement of Lithuanian journal “Medicina”.

LNDTA is preparing local recommendations of treatment and diagnostic, organising international conferences (Baltic meetings etc.) and national conferences for doctors, nurses, engineers, managing events for World Kidney Day each year. Association actively cooperates with Nephrology and Dialysis Nurses association (seminars, joint meetings) and with Kidney Patient Organization (educational programmes, Donor day, etc.). LNDTA prepared local recommendations for dialysis service, kidney transplantation and treatment of anemia, hyperphosphatemia, secondary hyperparathyroidism; translated, published and introduced international KDIGO guidelines on AKI, renal anemia, glomerulonephritis, CKD. Activities of LNDTA is coordinated by board and organized through committees (clinical nephrology, dialysis, transplantation and executive).
