CONTENTS

Foreword vii
Preface ix

Part I – STATISTICAL REPORTS

Combined report on regular dialysis and transplantation in Europe, XIV, 1983

Combined report on regular dialysis and transplantation of children in Europe, XIII, 1983
G Rizzoni, M Broyer, F P Brunner, H Brynger, S Challah, P Kramer, R Oulès, N H Selwood, A J Wing, É A Balás

Part II – GUEST LECTURES ON HAEMODIALYSIS

Dialysis membranes
E F Leonard

The importance of water treatment in haemodialysis and haemofiltration
P Keshaviah, D Luchmann

Part III – HAEMODIALYSIS: BIOCOMPATIBILITY

Acute pulmonary hypertension, leucopenia and hypoxia in early haemodialysis
J F Walker, R M Lindsay, W J Sibbald, A L Linton

Effect of eosinophilia on the heterogeneity of the anticoagulant response to heparin in haemodialysis patients
A Santoro, P Zucchelli, E Trombetti, E Degli Esposti, A Sturani, A Zuccalà, C Chiarini, M Casadei-Maldini, A Mazzuca

Direct interaction between polymorphonuclear neutrophils and cuprophan membranes in a plasma-free model of dialysis
C Tetta, A Jeantet, G Camussi, A Thea, L Gremo, P F Martini, R Ragni, A Vercellone
Effects of blood–dialyser interaction (sham-dialysis) on haemodynamics and oxygen tension in healthy man
A Danielsson, U Freyschuss, J Bergström

Blood lines should be considered in studies of biocompatibility during acetate haemodialysis
B Branger, R Oulès, D Treissède, J P Balducchi, F Michel, A Crastes de Paulet, M Treille

The effect of dialysate temperature on haemodialysis leucopenia
G Enia, C Catalano, F Pizzarelli, G Creazzo, F Zaccari, A Mundo, D Iellamo, Q Maggiore

Anaphylactoid reactions during haemodialysis are due to ethylene oxide hypersensitivity
A J Nicholls, M M Platts

Part IV – HAEMODIALYSIS: CARDIOVASCULAR STUDIES

Impaired regulation of β-adrenoceptors in patients on maintenance haemodialysis
A E Daul, A M Khalifa, N Graven, O-E Brodde

Changes in left ventricular anatomy during haemodialysis, continuous ambulatory peritoneal dialysis and after renal transplantation
A Deligiannis, E Paschalidou, G Sakellariou, V Vargemesis, P Geleris, A Kontopoulos, M Papadimitriou

The role of endogenous opioids in the baroreflex dysfunction of dialysis patients
C Zoccali, M Ciccarelli, F Mallamaci, Q Maggiore, M Stornello, E Valvo, L Scapellato

Absence of a beneficial haemodynamic effect of bicarbonate versus acetate haemodialysis
R Vanholder, M Piron, S Ringoir

Cardiovascular risk factors and cardiovascular death in haemodialysed diabetic patients
C Strumpf, F Katz, A J Wing, E Ritz

Part V – HAEMODIALYSIS POSTERS I

Effect of dialysate buffer on potassium removal during haemodialysis
A J Williams, J N Barnes, J Cunningham, F J Goodwin, F P Marsh
Favourable effects of bicarbonate dialysis on the body pool of phosphate
F Mastrangelo, S Rizzelli, V De Blasi, C Corlianò, L Alfonso, M Napoli, A M Montinaro, M Aprile, P Patruno

Sodium acetate, an arterial vasodilator: haemodynamic characterisation in normal dogs
M A Saragoca, Angela M A Bessa, R A Mulinari, S A Draibe, A B Ribeiro, O L Ramos

Effect of dialysate sodium on the dopamine, adrenaline and noradrenaline concentration in haemodialysis patients
A Ksiażek, J Solski

The cardiovascular and metabolic effects of mixtures of acetate and succinate: a potential improvement in dialysate solutions
F M Gonzalez, P L Kirkendol, J E Pearson, E Reisin

Changes in body compartments on different types of haemodialysis
M Garcia, M Carrera, C Piera, R Deulofeu, X Company, J Ma Pons, J Montoliu, J Setoain, L Revert

Raised serum nickel concentrations in chronic renal failure
M Drazniowsky, I S Parkinson, M K Ward, Susan M Channon, D N S Kerr

Changes in copper and zinc in chronic haemodialysis patients
S Hosokawa, H Nishitani, T Imai, T Nishio, T Tomoyoshi, K Sawanishi

Myocardial studies in haemodialysis patients
R Dudczak, L Fridrich, K Derfler, K Kletter, H Frischaufl, L Marosi, P Schmidt, J Zazgornik

Part VI – HAEMODIALYSIS POSTERS II

Alternative vascular access in patients lacking veins for standard arteriovenous fistulae
W P Reed, P D Light, J H Sadler, E Ramos

Initial experience with Hemasite vascular access device for maintenance haemodialysis
U Bonalumi, G A Simoni, D Friedman, E Borzone, F Griffanti-Bartoli

The Biocarbon® vascular access device (DiaTAB®) for haemodialysis
P J H Smits, M J H Slooff, D H E Lichtendahl, G K v d Hem

Haemodialysis in dogs with a heparin coated hollow fibre dialyser
L E Lins, P Olsson, M-B Hjelte, R Larsson, O Larm
Low molecular weight heparin in haemodialysis and haemofiltration — comparison with unfractioned heparin
H Renaud, P Moriniere, J Dieval, Z Abdull-Massih, H Dkhissi, F Toutlemonde, J Delobel, A Fournier

Haemodialysis with prostacyclin (Epoprostenol) alone
P B Rylance, M P Gordge, H Ireland, D A Lane, M J Weston

Reduction of silicone particle release during haemodialysis
J Bommer, E Pernicka, J Kessler, E Ritz

Carpal tunnel syndrome, shoulder pain and amyloid deposits in long-term haemodialysis patients
B Charra, E Calemard, M Uzan, J C Terrat, T Vanel, G Laurent

Reduction of osmotic haemolysis and anaemia by high dose vitamin E supplementation in regular haemodialysis patients
K Ono

Part VII — HAEMODIALYSIS POSTERS III

Vaccination against hepatitis B in patients with renal insufficiency
J Bommer, M Grussendorf, W Jilg, F Deinhardt, H-G Koch, G Darai, G Bommer, M Rambausek, E Ritz

Platelet life span in uraemia
H Tanaka, K Unimoto, N Izumi, K Nishimoto, T Maekawa, T Kishimoto, M Maekawa

Morbidity of patients with analgesic-associated nephropathy and end-stage renal failure
A Schwarz, W Pommer, F Keller, G Kuehn-Freitag, G Offermann, M Molzahn

Herpes virus infection prevalence in regular haemodialysis patients — a comparative evaluation of complement fixation, indirect immunofluorescence and Elisa tests
F Scolari, N Manca, S Sandrini, L Cristinelli, E Prati, G Setti, S Savoldi, A Turano, R Maiorca

Nitrate induced anaemia in home dialysis patients
M Salvadori, F Martinelli, L Comparini, S Bandini, A Sodi

Nitrogen balance: an adequate treatment prescription index for children on haemofiltration
M Giani, M Picca, A Saccaggi, R Galato, A Bettinelli, C Funari, R Rusconi, L Ghio, A Edefonti
Visual function, blood pressure and blood glucose in diabetic patients undergoing continuous ambulatory peritoneal dialysis
J Rottembourg, P Bellio, K Malga, M Remaoun, F Rousselie, M Legrain

Computerised program to compare tolerance of dialysis patients to different dialysis schedules
F Lonati, B Pea, A Castellani

Systolic timer intervals before and after haemodialysis
J Braun, H Rupprecht, U Gessler

Part VIII – HAEMODIALYSIS: ALUMINIUM STUDIES

Gastrointestinal aluminium absorption: is it modulated by the iron-absorptive mechanism?
J B Cannata, C Suarez Suarez, V Cuesta, R Rodriguez Roza, M T Allende, J Herrera, J Perez Llanderal

Protein binding of aluminium in normal subjects and in patients with chronic renal failure
H Rahman, S M Channon, A W Skillen, M K Ward, D N S Kerr

Desferrioxamine induced aluminium removal in haemodialysis
J Bonal, J Montoliu, J Lópe Pedret, E Bergadà, L Andrew, M Bachs, L Revert

The desferrioxamine test predicts bone aluminium burden induced by Al(OH)_3 in uraemic patients but not mild histological osteomalacia
A Fournier, P Fohrer, P Leflon, P Moriniere, M Tolani, G Lambrey, R Demontis, J L Sebert, F Van Devyver, M Debroe

Iron removal by desferrioxamine during haemodialysis: in vitro studies
D E Müller-Wiefel, U Vorderbrügge, K Schärer

Desferrioxamine treatment for aluminium and iron overload in uraemic patients by haemodialysis or haemofiltration
C A Baldamus, H Schmidt, E-H Scheuermann, E Werner, J P Kaltwasser, W Schoeppe

Part IX – POSTERS ON HAEMODIALYSIS, ALUMINIUM STUDIES, OSTEODYSTROPHY

Incorporation of aluminium and effect of removal in experimental osteomalacia and fibro-osteoclasis
T Hess, K Gautschi, H Jungbluth, U Binswanger
1αOH vitamin D₃ increases plasma aluminium in haemodialysed patients taking Al(OH)₃
A Fournier, R Demontis, Y Tahiri, M Herve, Ph Moriniere, A Leflon, Z Abdull-Massih, H Atik, S Benelmouffok

Red blood cells indices and aluminium toxicity in haemodialysis patients
C Tielemans, L Kalima, F Collart, R Wens, J Smeyers-Verbeke, D Verbeelen, M Dratwa (introduced by P Vereerstraeten)

Bone scan in haemodialysis patients: relation to hyperparathyroidism and aluminium toxicity
C Tielemans, R Wens, F Collart, M Dratwa, J Smeyers-Verbeke, I Van Hooff, G De Roy, P Bergmann, D Verbeelen (introduced by P Vereerstraeten)

The bone scan in patients with aluminium-associated bone disease
J Botella, J L Gallego, J Fernandez-Fernandez, D Sanz-Guajardo, A de Miguel, J Ramos, P Franco, R Enriques, C Sanz-Moreno

Assessing the benefit of changing aluminium hydroxide schedule on anaemia and serum phosphorus control
J B Cannata, C Suarez Suarez, C Rodrigues Suarez, V Cuesta, A Sanz-Medel, V Peral, J Herrera

Influence of biochemical and hormonal factors on the bone histomorphometric features of uraemia patients
A Fournier, J L Sebert, P Fohrer, Ph Moriniere, G Lambrey, M A Herve, P Leflon, J Gueris, M Garabedian

Fluoride metabolism and renal osteodystrophy in regular dialysis treatment
J Erben, B Hájaková, M Pantůček, L Kubes

Evaluation of the intact hormone assay in the study of parathyroid autograft function
E C R Wijeyesinghe, A J Parnham, J R Farndon, R Wilkinson

Usefulness of ⁹⁹ᵐ-Tc pyrophosphate bone scintigraphy in the survey of dialysis osteodystrophy
J L Vanherweghem, A Schoutens, P Bergman, M Dhaene, M Goldman, M Fuss, P Kinnaert

Bone mineral loss during centre and home haemodialysis. Influence of vitamin D metabolites and serum parathyroid hormone
H Rickers, M Christensen, C Christiansen, P Rødbro
Part X – HAEMOFILTRATION AND HAEMODIAFILTRATION

Haemofiltration without substitution fluid
G Civati, C Guastoni, U Teatini, A Perego, D Scorza, L Minetti

Performance characteristics of high flux haemodiafiltration
B von Albertini, J H Miller, P W Gardner, J H Shinaberger

Standard methods for the microbiological assessment of electrolyte solution prepared on line for haemofiltration
H U Mayr, F Stec, C M Mion

Phosphorus kinetics during haemodialysis and haemofiltration
H Poggilitsch, W Petek, E Ziaik, F Sterz, H Holzer

Concomitant removal of aluminium and iron by haemodialysis and haemofiltration after desferrioxamine intravenous infusion
C Ciancioni, J L Poignet, G Naret, S Delons, Y Mauras, P Allain, N K Man

Part XI – SYMPOSIUM: OPTIMUM DIALYSIS TREATMENT FOR PATIENTS OVER 60 WITH PRIMARY RENAL DISEASE. SURVIVAL, CLINICAL RESULTS, QUALITY OF LIFE

Maintenance haemodialysis treatment in patients aged over 60 years.
Demographic profile, clinical aspects and outcome
C Jacobs, A Diallo, E A Bâlès, M Nectoux, S Etienne

Maintenance dialysis in the elderly. A review of 15 years’ experience in Languedoc-Roussillon

Optimum dialysis treatment for patients over 60 years with primary renal disease. Survival data and clinical results from 242 patients treated either by haemodialysis or haemofiltration
K Schaefer, G Asmus, E Quellhorst, A Pauls, D von Herrath, J Jahnke

Part XII – GUEST LECTURES ON NEPHROLOGY I

Glomerulonephritis in essential mixed cryoglobulinaemia
G D’Amico, F Ferrario, G Colasanti, A Bucci
Effects of various diets on the progression of human and experimental uraemia
C Giordano, G Capodicasa, N G De Santo

PART XIII – NEPHROLOGY: DIET AND PROGRESSION OF RENAL DISEASE

Influence of phosphate restriction, keto-acids and vitamin D on the progression of chronic renal failure

Early protein restriction in chronic renal failure
J B Rosman, P M ter Wee, G Ph Piers-Becht, W J Sluiter, F J van der Woude, S Meijer, A J M Donker

Long-term outcome of renal function and proteinuria in kidney transplant donors
O Mathillas, P-O Attman, M Aurell, I Blohmé, H Brynger, G Granerus, G Westberg

Renal function and blood pressure after donor nephrectomy
J S Tapson, S M Marshall, S R Tisdall, R Wilkinson, M K Ward, D N S Kerr

Part XIV – NEPHROLOGY POSTERS I

Adult-onset nephrotic syndrome with minimal changes: response to corticosteroids and cyclophosphamide
F Nolasco, J Stewart Cameron, J Hicks, C S Ogg, D G Williams

Follow-up prednisolone dosage in rapidly progressive crescentic glomerulonephritis successfully treated with pulse methylprednisolone or plasma exchange
M E Stevens, J M Bone

Effects of dietary protein restriction on the course of early renal failure
G Zakar (introduced by I Taraba)

Alteration of the course of chronic renal failure by dietary protein restriction
A J Williams, S E Bennett, G I Russell, J Walls

Effects of naloxone infusion on gonadotrophin and prolactin concentrations in patients with chronic renal failure
M Cossu, G B Sorba, M Maioli, P Tomasi, G Delitala
Human pancreatic polypeptide and somatostatin in chronic renal failure
R Lugari, S David, P Dall’Argine, V Nicolotti, A Parmeggiani, A Gnudi,
A Luciani, S Toscani, R Zandomeneghi

Part XV — GUEST LECTURE ON DIABETIC NEPHROPATHY

Diabetic nephropathy: a preventable complication?
C G Viberti, M J Wiseman, J J Bending

Part XVI — DIABETIC NEPHROPATHY

Urinary excretion of albumin with an altered three-dimensional
conformation in diabetic functional nephropathy. Evidence for a
pathogenetic role
G M Ghiggeri, G Candiano, G Delfino, C Querirolo

Low molecular weight proteinuria in diabetic children — a marker
of early diabetic nephropathy?
R Wartha, D Nebinger, D Gekle

Radionuclear determination of glomerular filtration rate and renal
plasma flow to detect early decrease of renal function in insulin
dependent diabetes
C Cascone, G Beltramello, N Borsato, F Cavallin, P Calzavara,
M De Luca, F Susanna, D Madia, P Zanco, B Saitta, M Camerani,
G Ferlin

Glycosylated proteins in diabetic nephropathy
M Ramzy, M Habib, N El-Sheemy, M Dunn, I Iskander, S Samney,
S H Doss

Results of transplantation of kidneys from diabetic donors
H van Goor, M J H Slooff, G D Kremer, A M Tegzess

Part XVII — NEPHROLOGY: GLOMERULAR DISEASE

Macrophage function in primary and secondary glomerulonephritis
D Roccatello, R Coppo, G Martina, C Rollino, B Basolo, G Picciotto,
F Bayle, P Bajardi, A Amoroso, D Cordonnier, G Piccoli

Interstitial foam cells in the nephrotic syndrome belong to the
monocyte/macrophage lineage
F Nolasco, J Stewart Cameron, R Reuben, B Hartley, F Carvalho,
R A Coelho
Aetiology and prognosis of de novo graft membranous nephropathy
Y Pirson, J Ghysen, J P Cosyns, J P Squifflet, G P J Alexandre,
C van Ypersele de Strihou  672

Renal involvement in a syndrome of vasculitis complicating HBsAg
negative cirrhosis of the liver
J Montoliu, A Darnell, J Ma Grau, A Torras, L Revert  677

Familial nephropathic amyloidosis associated with indomethacin
responsive fever
T G Feest, J P Wallis  683

Immune function and renal transplantation in Fabry’s disease
D Donati, M G Sabbadini, F Capsoni, L Baratelli, D Cassani,
A De Maio, G Frattini, M Martegani, L Gastaldi  686

Part XVIII – NEPHROLOGY: GLOMERULAR DISEASE II

Hypertension in mesangial IgA glomerulonephritis
M Rambausek, R Waldherr, K Andrassy, E Ritz  693

Are β-haemolytic streptococci involved in the pathogenesis of
mesangial IgA-nephropathy?
S Rekola, A Bergstrand, H Bucht, A Lindberg  698

IgA mesangial deposits in C3H/HeJ mice after oral immunisation
C Genin, J C Sabatier, F C Berthoux  703

The prevention of amyloidosis in Familial Mediterranean fever with
colchicine
S Cabili, D Zemer, M Pras, A Aviram, E Sohar, J Gafni  709

Lupus nephritis in males and females
I E Tareyeva, T N Janushkevitch, S K Tuganbekova  712

Filtration fraction: an index of renal disease activity in patients with
systemic lupus erythematosus
H Favre, P A Miescher  717

Part XIX – NEPHROLOGY POSTERS II

The effect of continuous subcutaneous insulin infusion on renal
function in type I diabetic patients with and without proteinuria
E van Ballegooie, P E de Jong, A J M Donker, W J Sluiter  722

xx
Characterisation of mechanisms responsible for uraemic insulin resistance: in vitro experiments
O Pedersen, O Schmitz, E Hjøllund, B Richelsen, H E Hansen

Ultrastructural markers of tubular transport in experimental diabetes insipidus
L Cieciura, Z Kidawa, B Jaszczuk-Jarosz, K Trznadel, J Konopacki

Distal tubular sodium and water resorption in man
E Bartoli, R Faedda, A Satta, M Sanna, G F Branca

High fluid intake or pharmacological therapy in recurrent stone former patients?
A Aroldi, G Graziani, P Passerini, C Castelnovo, A Mandressi, A Trinchieri, G Colussi, C Ponticelli

Magnesium renal wasting in calcium stone formers with idiopathic hypercalciuria contrasting with lower magnesium: calcium urinary ratio
P Bataille, A Pruna, I Finet, P Leflon, R Makdassi, C Galy, P Fievet, A Fournier

Acute renal failure in an infant with partial deficiency of hypoxanthine-guanine phosphoribosyltransferase
A-M Wingen, W Löffler, R Waldherr, K Schärer

Vitamin D metabolites and osteomalacia in the human Fanconi syndrome
G Colussi, Maria Elisabetta De Ferrari, M Surian, F Malberti, G Rombolà, G Pontoriero, G Galvanini, L Minetti

Effects of acute and chronic ranitidine administration on renal function and parathyroid activity in chronic renal failure
N Pozet, M Labbeauw, A Hadj Aissa, C Bizolon, P Zech, J Traeger

Cimetidine the H₂-receptor blocker: effect on the renal autoregulation in dogs
M A Sobh

Part XX – GUEST LECTURES ON NEPHROLOGY II

Non-invasive assessment of the kidney. What do nuclear medicine, ultrasonography, digital vascular imaging, computed tomography and magnetic resonance contribute to diagnosis in nephrology?
C van Ypersele de Strihou

Mechanisms and factors regulating the growth of glomerular cells
G E Striker, Liliane Morel-Maroger Striker
Plasma renin activity, plasma aldosterone and distal urinary acidification in diabetics with chronic renal failure
J Grande, J F Macias, J Miralles, J M Tabernero

Renin angiotensin aldosterone system, urinary prostaglandins and kallikrein in pregnancy induced hypertension. Evidence for a dis-regulation of the renin-angiotensin-prostacyclin loop
P Fievet, A Fournier, E Agnes, M A Herve, A Carayon, J F de Fremont, A Mimran, A Dufour, P Verhoest, J C Boulanger

Aldosterone response to modulation of potassium in patients on dialysis or with essential hypertension
K Olgaard, E Langhoff, E Tvedegaard, S Madsen, M Hammer, H Daugaard, M Egjfjord, J Ladefoged

Role of prostaglandins in captopril-induced natriuresis
G Conte, A Dal Canton, G Maglionico, C Di Spigno, B Pirone, D Russo, G Di Minno, V E Andreucci

Effect of zinc treatment on cell mediated immunity of chronic renal failure patients
D Grekas, N Tsakalos, Z Giannopoulos, A Tourkantonis

Adult height in paediatric patients with chronic renal failure
G Gilli, K Schärer, O Mehls

Part XXII – NEPHROLOGY: EXPERIMENTAL

Acute renal failure and tubular damage due to sepsis in an animal model
A L Linton, J F Walker, R M Lindsay, W J Sibbald

The effects of d-propranolol and captopril on post-ischaemic acute renal failure in rats
M Ishigami, T Maeda, S Yabuki, N T Stowe

Cyclosporine and short ischaemia: a new model of experimental acute renal failure in rats
A Iaina, D Herzog, D Cohen, S Gavendo, S Kapuler, I Serban, G Schiby, H E Eliahou

Glomerulotubular function in cyclosporine-treated rats. A lithium clearance, occlusion time/transit time and micropuncture study
H Dieperink, H Starklint, P P Leyssac, E Kemp
Unilateral ureteric ligation in diabetic rats: a pathologic and morphometric study
G Hatzigeorgiou, P N Ziroyanis, H Paraskevakou, P Vardas, C Georgilis, M Mavrikakis

Part XXIII – NEPHROLOGY II

Reversible tubular dysfunction in alcohol abuse
S De Marchi, E Cecchin, F Grimaldi, A Basile, L Dell’Anna, F Tesio

Tubular function and renal selectivity towards glycosyl-albumin in diabetic hyperosmolar states
G Delfino, G Candiano, G M Ghiggeri, C Querirolo

Intracellular bicarbonate and pH of skeletal muscle in chronic renal failure
A Guariglia, C Antonucci, E Coffrini, S Del Canale, E Fiaccadori, F Reni, P Vitali, U Arduini, A Borghetti

Ectopic calcification. The role of parathyroid hormone

Ultrasonically guided fine-needle alcohol injection as an adjunct to medical treatment in secondary hyperparathyroidism
A Giangrande, P Cantù, L Solbiati, C Ravetto

Low incidence of hyperparathyroidism in diabetic renal failure
J Aubía, J Bosch, J Lloveras, Ll Mariño, J Masramon, S Serrano, X Cuevas, A Orfelia, I Llorach, M Llorach

Part XXIV – GUEST LECTURE ON TRANSPLANTATION I

Studies on living related kidney donors at a single institution
J S Najarian, D Weiland, Blanch Chavers, R L Simmons, W D Payne, Nancy L Ascher, D E R Sutherland

Part XXV – TRANSPLANTATION POSTERS I

Transfusion-induced enhancement of prostaglandin and thromboxane release in prospective kidney graft recipients
V Lenhard, G Maassen, G Opelz
Polycythæmia is erythropoietin-independent after renal transplantation
S Lamperi, S Carozzi, A Icardi

Kidney transplantation in patients on continuous ambulatory peritoneal
dialysis
Z Shapira, D Shmueli, A Yussim, G Boner, C Haimovitz, C Servadio

Pneumatos is intestinalis in patients after cadaveric kidney transplantation:
possible relationship with an active cytomegalovirus infection
W J van Son, F J van der Woude, E J van der Jagt, A J M Donker,
S Meijer, M J H Slooff, T H The, A M Tegzess, L B van der Slikke

Impaired fibrinolysis after kidney transplantation
R Seitz, R Michalik, R Egbring, H E Karges, H Lange

Part XXVI – GUEST LECTURE ON TRANSPLANTATION II

Rejection and nephrotoxicity. Diagnostic problems with cyclosporine in
renal transplantation
R Pichlmayr, K Wonigeit, B Ringe, T Block, R Raab, B Heigel,
P Neuhaus

Part XXVII – TRANSPLANTATION: CYCLOSPORINE

Clinical results and cyclosporine effect on prednisolone metabolism of
cadaver kidney transplanted patients
E Langhoff, S Madsen, K Olgaard, J Ladefoged

Does cyclosporine inhibit renal prostaglandin synthesis?
D Adu, C J Lote, J Michael, J H Turney, P McMaster

Cyclosporine nephropathy after heart and heart-lung transplantation
J Goldstein, Y Thoua, F Wellens, J L Leclerc, J L Vanherweghem,
P Vereerstraeten, G Primo, C Toussaint

Comparison of three immunosuppressive regimens in kidney
transplantation: a single-centre randomised study
M Hourmant, J P Soulillou, J Guenel

Improvement in cyclosporine handling by anti-lymphocyte globulin in
the early post-operative period
R Grundmann, P Wienand, U Hesse
Part XXVIII – TRANSPLANTATION POSTERS

The use of cyclosporine only in cadaveric renal transplant recipients: conversion to prednisolone and azathioprine after four months

Conversion from cyclosporine to prednisolone and azathioprine. Safe or unsafe?
D Adu, J Michael, T Vlassis, P McMaster

Does renal failure induce a decrease in cyclosporine blood concentrations?
M Burnier, P Aebischer, J P Wauters, J L Schelling

Increased interleukin II production during kidney allograft rejection
H Vie, M Bonneville, R Cariou, J F Moreau, J P Soulilou

Metabolic effects of conversion from cyclosporine to azathioprine in renal transplant recipients
K P G Harris, G I Russell, S P Parvin, P S Veitch, J Walls

Glomerular C3b receptor loss in renal allografts
F Nolasco, B Hartley, R Reuben, K Welsh

Cyclosporine-associated lymphoproliferation, despite controlled cyclosporine blood concentrations, in a renal allograft recipient
J B Dossetor, T Kovithavongs, M Salkie, J Preiksaitis

Short-term kidney preservation: to perfuse or not to perfuse with the new Belzer perfusate
R McCabe, J Lin, K Cooke, M Jean-Jacques

Thromboxane B2 and \( \beta_2 \)-microglobulin as early indicators of renal allograft rejection
H B Steinhauer, H Wilms, P Schollmeyer

T cell subsets in renal transplanted patients defined by theophylline sensitivity and monoclonal antibodies
Z Shapira, B Shohat, A Yussim, D Shmueli, C Servadio

Monitoring of NK-1 and NK-15 subsets and natural killer activity in kidney transplant recipients receiving cyclosporine
E Renna Molajoni, V Barnaba, A Bachetoni, M Levrero, P Cinti, M Rossi, D Alfani, R Cortesini
